## EASY HAMMER P3

No more struggling or bending trying to handle heavy hammers. The 'Easy Hammer' takes the pain out of demolition by lifting all types of lino and tiles, breaking rocks and blocks, cracking concrete and sandstone all with a minimum effort. With a wide angle range the Jack Hammer Trolley adapts to any situation.

The new model is out! Re-engineered from the ground up, this Easy Hammer will outlast the worst abuse of any hiring tradesman.

### PRODUCT FEATURES

Model: EHP3

<b>Features:</b>
<b>Weight:</b> 22.5kg (No Hammer)
Built-in Shock Reduction
Huge Angle Range
Durable Zinc Plating

<b>Suits:</b>
Hitachi Hammers
Milwaukee Hammers

### FLOOR STRIPPER

'Sammy' Floor Stripper is a heavy duty industrial machine designed to remove materials such as vinyl, glued carpet and cork from floors.

### WIDE CHISEL

A self sharpening flipable chisel head for Hitachi hammers and suitable in almost all demolition situations. This understated tool has an extended life over other chisels out in the market.

### LINO HEAD

The 'Floor Cleaning Tool' is an extremely durable and efficient tool for taking up vinyl flooring cork and most ceramic tiles. Built from a solid block of tool grade steel this tool fits most hammers.

## ELECTRIC / PETROL MINICON

The Petrol Minicon Saw is a heavy duty machine designed to cut through all types of concrete. The hand operated lever makes 'Incremental Depth Cutting' a breeze. This light weight and durable concrete cutter is a perfect choice for the hire and construction industry; through cutting slabs, crack chasing and concrete repair work, this machine has become a popular pedestrian road saw.

### PRODUCT FEATURES

Model: 14" Blade / 16" Blade - 7hp Subaru Robin  
14" Blade - 2.2kw 240V Single Phase Motor

<b>Features:</b>
<b>Weight:</b> 48kg
10L Water Tank
Hose Fitting
Folding Handle
Cutting Guide Sight
Dust Suppressor
Collapsible Handle
Powder Coated
Strong Steel Construction
Zinc Plated Finish

<b>Max Cutting Depth:</b>
14" Blade: 120mm
16" Blade: 145mm
<b>Incremental Cut Depths:</b>
25mm

## CORMIDI RANGE

Cormidi are leading the way with their latest range of tracked narrow access dumpers. With over 15 models in the range, they have redefined the narrow access market for the construction, excavation and landscaping industries. Allowing a more efficient means of transporting material on and off worksites not to mention the reduced risk of OH&S injuries in the workplace.

The 'Cormidi 500Kg Hi Tip' model is 700mm wide allowing access to most sites it also has a bucket tipping height of 1.45m allowing the machine to reach skip bins and up to 3 tonne trucks.

### CORMIDI 800

<b>Features:</b>
<b>Load Capacity:</b> 800kg
<b>High Tip:</b> 1450mm
<b>Speed:</b> 0-6.3 km/h

### CORMIDI 500

<b>Features:</b>
<b>Load Capacity:</b> 500kg
<b>High Tip:</b> 1450mm
<b>Speed:</b> 0-4 km/h

### CORMIDI 650

<b>Features:</b>
<b>Load Capacity:</b> 650Kg
<b>High Tip:</b> 1450mm
<b>Speed:</b> 0-6.3 km/h

### CORMIDI 1000

<b>Features:</b>
<b>Load Capacity:</b> 1000Kg
<b>High Tip:</b> Not Available
<b>Speed:</b> 0-6km/h

## CORMIDI 150

Built on the sturdy 'Cormidi 500' chassis this miniloader is built for the tough Australian working conditions. With a tight access chassis and skid steer tracked wheels this dumper can fit through a standard doorway and get almost anywhere and load almost anything with a 4 in 1 bucket. Add this with the ability to tip into anything up to 1.6 metres high and this little dynamo becomes the highest tipper in the Cormidi range.

### PRODUCT FEATURES

Model: 130kg Standard Tip 7.0Hp Yanmar Diesel  
130kg Standard Tip 6.5Hp Honda Petrol

<b>Features:</b>
<b>Load Capacity:</b> 130kg
<b>High Tip:</b> 1600mm
<b>Speed:</b> 0-4 km/h
<b>Net Weight:</b> 370kg
<b>Rocking Roller System</b>

<b>Hydraulic Tipping-Bucket</b>
<b>4 in 1 bucket</b>
<b>Bucket Dimensions:</b>
65Ltr Bucket
Optional: Pallet Tines

**AlturnaMATS®**

	2400 x 1200 (Versa / Alturna)
	2400 x 900 (Versa / Alturna)
	2400 x 600 (Versa / Alturna)
	1800 x 900 (Trade / Alturna)

## GROUND PROTECTION MATS

'Alturna Ground Protection Mats' provide the perfect solution for short term road ways and paths. Made from recycled material, the mats distribute weight across their surface which protects the ground beneath.

- Place mats down before moving machinery across established lawns
- Link them together creating a road way to prevent being bogged
- Provides a clean and safe walkway for pedestrians

Features:
12.5mm Thick PE Plastic
6 Year Warranty
Holds 60 Metric Tonnes
Protects Ground
Supports Machinery
Temporary Path or Road
Optional:
Handy Hooks
Double Links
Single Links

Versa Mats:
Side 1: Diamond Tread
Side 2: Non-slip Print
Colours: Black and White
Alturna Mats:
Side 1: Diamond Tread
Side 2: Diamond Tread
Colours: Black
Trade Mats:
Side 1: Non-slip Print
Side 2: Non-slip Print
Colours: Black
Hand Grips

## 180° SWIVEL DUMPER

The 180° tracked dumper sounds like a good idea, but just wait until you use it. The S100 can; work along side fences and buildings, base fill of back-fill a trench when laying pipe, fill material into a golf bunker or an awkwardly positioned hole, even fill a grave moving between existing headstones. Combine a bucket that can tip anywhere in the 180° radius, an overall width of 980mm and a hydrostatic transmission, and you can understand why the S100 is suited to confined spaces.

*"Roockwood Independent Cemetery indicated a 2.5 hour saving in labour per grave, which was dug using the Canycom S100 Swivel Dumper"*
